Charts

1. Trading can be performed also from the upper left corner of the chart – 'One click' and it works exactly like 'Click and trade'. SL/TP also can be also adjusted here.

Other options in this section are:

- placing pending order;
- chart types switch;
- zoom in/out and chart position settings.

It will be described more specifically in the other chapter.

2. The orders can also be placed directly from a chart by clicking the right mouse button on the chart'sfield.

Ticket

The Ticket is a tool used to place an instant or pending order. Instant execution is used when the trader wants to open a position immediately. Furthermore, the ticket is used as a Trader Calculator. It shows in a real-time the amount of the margin necessary to open the trade, commissions (if any), pip's value, the value of the spread and Daily Swaps (if any).

4. Charts

The chart provides countless ways of personalisation. Here are some major elements to configure.

- 1. In order to add a new chart there are multiple ways to do it:
- click the right mouse button on a particular instrument in Market Watch and then 'Open chart';
- choose an instrument in Market Watch and click Open Chart ⁽¹⁾;
- drag and drop click on a particular instrument and drag it to the chart module;
- switch the instrument on an already existing chart: click on the name of an instrument in the upper leftcorner of a chart and type another instrument name.

Please note - all of the charts are drawn by bid prices.

2. Chart types can be chosen from five available ones: Candlestick, Line, OHLC, HLC, and Heikin Ashi.
